

BT500P

Does The Work and Proves Results

The BT500P is an advanced hand-held battery starting and charging system tester for vehicle batteries. With its built-in thermal printer, this tool is designed for automotive shops that prefer to have the printed report in hand. This device also provides faster and more accurate test results for 12V & 24V batteries. Technicians can confirm the system's health faster, getting results in under a minute, keeping you productive all day.
