Versatility

Unlimited
Potential

TOPDON's PulseQ is the first of TOPDON's EV charging stations. Offering versatility, adaptability, and smart technology to users, the PulseQ makes EV charging widely accessible. It's compatible with most American AC electric vehicles because of the SAE J1772 (Type 1) plug, eliminating most brand barriers to electric vehicle owners. The compact design and multiple mounting options save space in garages, and can even be mounted outside to take up no interior space. The charging station's interface can be accessed and adjusted through an app to set charging sessions during off-hours and to monitor the charging process.

Features:

Safety And Durable
