FAQs

How to activate the software

Step 1:

Plug the TopScan Moto into the DLC (Data Link Connector) of your motorcycle.

Note: If the DLC of your motorcycle is not an OBD-II port, additional adapters* are required (not included) to connect the TopScan Moto to your motorcycle.

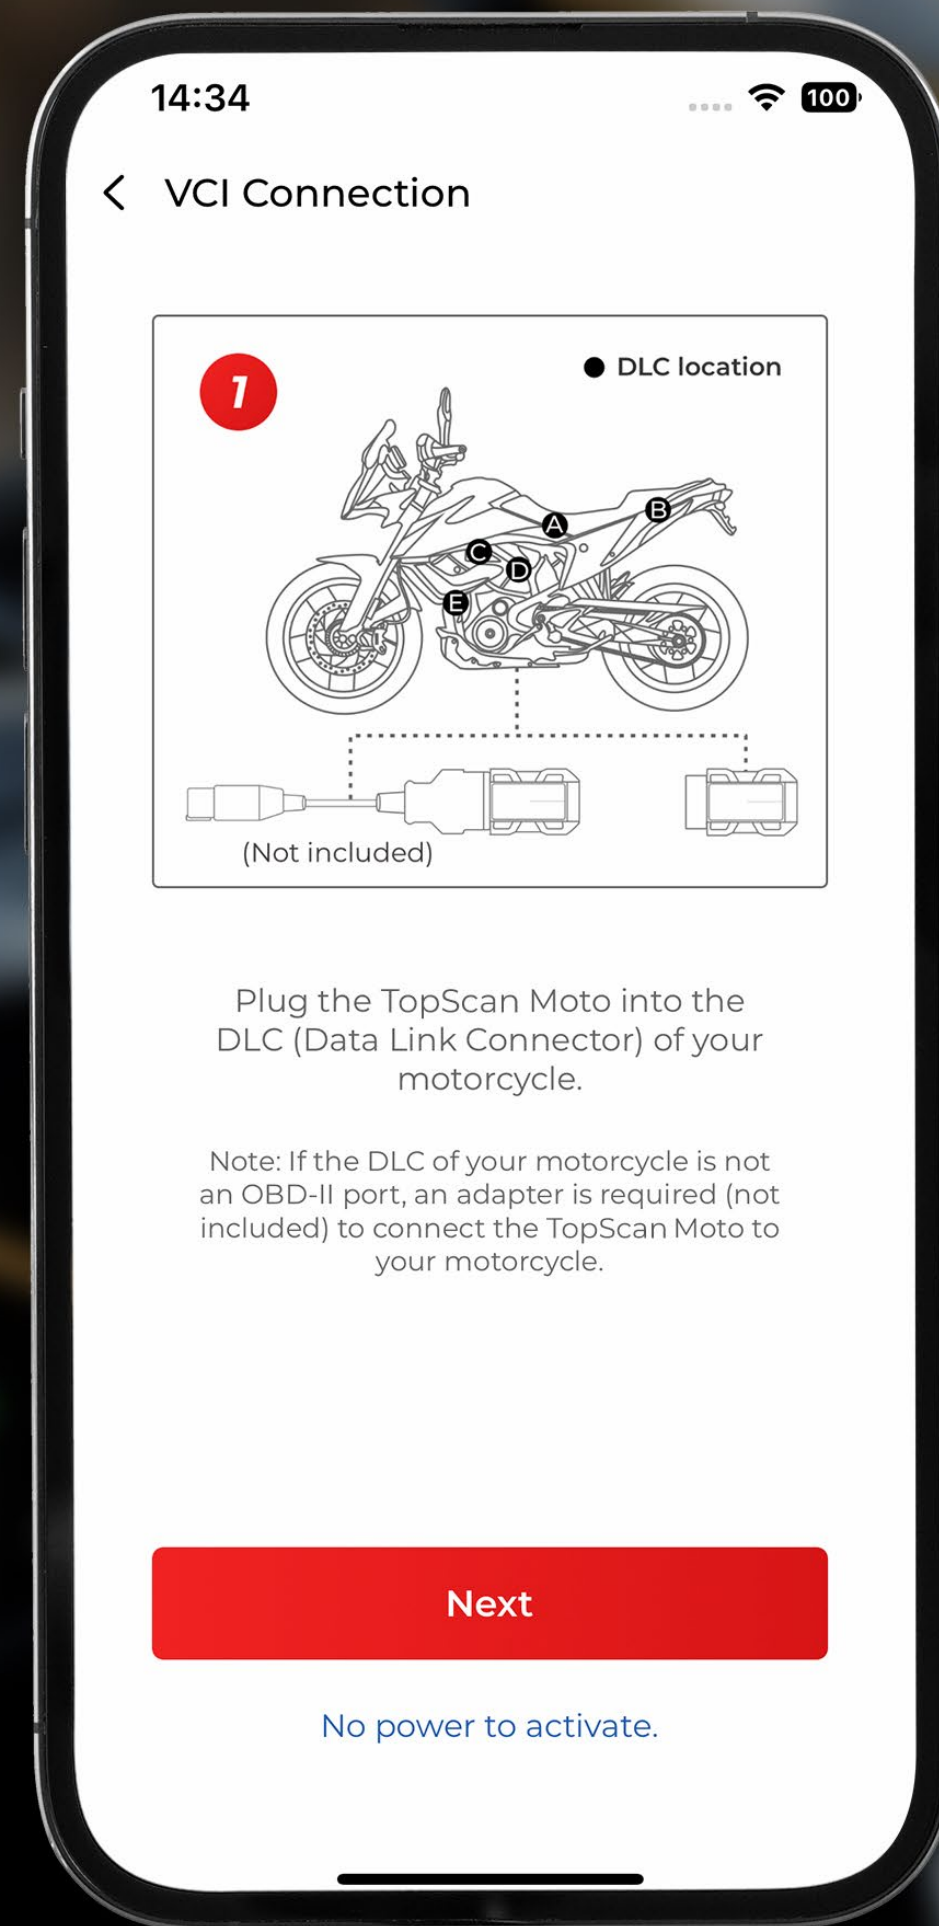

Step 2:

Start vehicle engine.

Step 3:

Make sure the LED light on the device is solid red and search for Bluetooth. Once connected, the LED light on the device will turn solid blue.

*Please visit our official website to find the corresponding adapters according to your bike's make and model.

Question

What should I do if a communication error occurs?

Features

Answer

Follow the steps below to identify the problem:

- 1)** Check if the ignition is ON.
- 2)** Check if the TopScan Moto is securely plugged into the motorcycle's OBD-II port.
- 3)** Turn the ignition off. Wait 10 seconds before turning it back on and continue the operation.
- 4)** Check if the vehicle's control module is defective.

Question

Why do I need to download the diagnostic software after installing the TopScan app?

Features

Answer

Since there are various vehicle manufacturers, different diagnostic software is required for different brands.

Functions

Question

Do I need to update the firmware before using it for the first time?

How to Activate
the Software

Answer

Yes. Firmware will automatically update to the latest version once the TopScan is connected with your phone via Bluetooth. You can also tap Me > Firmware Update to update the firmware manually.
